Business Intelligence Engineering | Product Analytics | Applied Data Science
(507) 272-7915 | markusstomas@gmail.com | linkedin.com/in/markuss-saule | msaule.github.io

Summary

Enterprise data and AI builder designing the measurement, forecasting, and governed intelligence systems behind high-stakes decisions. Combines product analytics, statistical engineering, and applied ML to surface inflection points across 1.5M-user digital ecosystems, vehicle demand, and clinical workflows. 4.0 GPA; CRAN publisher, Microsoft Research awardee, and upstream contributor across core ML and data tooling.

Experience

Volvo Group

Business Intelligence & Analytics Intern

May 2026 - Present
Greensboro, NC

- Led Adobe CJA migration for 1.5M+ monthly web users across vehicle funnels and configurators.
- Built the executive case to retire 2 martech platforms, positioning a \$100K annual run-rate reduction.
- Built demand sensing across web behavior and sentiment; identified a 15-26% quarterly shift in truck demand.

BYU-Idaho Online Employment & Scheduling

Data & Campaign Analytics Coordinator

Oct. 2024 - May 2026
Rexburg, ID

- Optimized a \$4K Meta recruiting campaign through segmentation, generating 2,250 qualified applicants.
- Built KPI dashboards that increased hiring engagement 320% across student and faculty audiences.
- Designed an AI-assisted screening workflow that standardized evaluation for 1,000+ global applicants.

Fresno State Hockey

Digital Data & Insights Coordinator

Jun. 2025 - Sep. 2025
Fresno, CA

- Built a scoring model that ranked 350+ sponsor prospects and surfaced \$370K in sponsorship value.
- Automated KPI dashboards, cutting weekly reporting time 70% and improving leadership decision speed.
- Synthesized performance across 4+ channels to sharpen high-value audience targeting and sponsor-outreach strategy.

Ministry of Health of Latvia

Marketing & Analytics Intern

Jun. 2021 - Oct. 2021
Riga, Latvia

- Analyzed vaccination trends for a national COVID-19 campaign reaching 175,000 people across Latvia.
- Unified vaccination and audience data across 3 departments to align national targeting and public-health messaging.
- Built channel-performance views that redirected the 175K-person campaign toward stronger audience segments.

Selected Projects

- Built **Earnings Quality Autopsy**, a 187-test SEC/XBRL research system with 9 modules and 14 API routes.
- Published 2 CRAN packages: **Ravel** (1,700+ users) and **falsifyr** for adversarial statistical testing.
- Built **Radiology Value Pipeline**, a governed clinical-AI workflow with audit trails, BI marts, and MRI validation.
- Shipped **Roblox worlds and game systems** with 7.5B+ plays; personally commended by CEO David Baszucki.
- Earned 10 Advanced Acceptance selections in the **Microsoft Research Asia Global AI Values Challenge**.

Open Source Engineering

Upstream contributions across core ML and data tooling: scikit-learn, TransformerLens, Posit Air, and MONAI Label; developed correctness tests, typed interfaces, and clinical-AI conformance design.

Education

Brigham Young University-Idaho

B.S. Business Analytics; Minors in Statistics and Data Science; GPA: 4.0

Expected Apr. 2027
Rexburg, ID

Technical Skills

Applied ML & Engineering: Python, R, pandas, scikit-learn, XGBoost, SHAP, FastAPI, simulation, forecasting
Data & Product Systems: SQL, ETL, data modeling, APIs, instrumentation, experimentation, metric governance
Analytics & BI: Power BI, DAX, Power Query, Adobe CJA, statistical modeling, executive reporting
Languages: Latvian (native), English (C2), Russian (C1) | **Code:** github.com/msaule
